

EDEN and HERTS VALLEYS DIABETES EDUCATION: Glycaemic Treatment Options including Newer Therapies

Interested in the new NICE guidance and how it may effect prescribing recommendations?

We are inviting GPs, Practice Nurses and Pharmacists to attend a short upskilling training workshop

The expanding number of new type 2 diabetes agents and how to effectively use them can be challenging

This study afternoon aims to help you meet these challenges and includes:

- Detail on latest glycaemic treatment options including making safe therapy choices
- The latest evidence on prescribing the newer agents including SGLT2s

What does the training provide?

- Updates on both oral medications and the latest injectable therapies, GLP1s and insulin
- Updated knowledge and skills to enhance patient glycaemic management.

Information:

DATE: Wednesday 10th January 2018
