&

Monday 19 March 2018

7.30PM TO 9.30PM

Buffet will be served from 7pm

NOVOTEL STEVENAGE, KNEBWORTH PARK, STEVENAGE, SG1 2AX

The EMOP project is aimed to be implemented by Lister Hospital on 3 April 2018.

The EMOP project is the electronic and secure transfer of a copy of a patient's discharge prescription (TTA) from the hospital to the patient's chosen community pharmacy using PharmOutcomes. On discharge patient's medicines information from TTA will be sent to the community pharmacy via PharmOutcomes if the patient consents.

Community pharmacies will automatically be opted in to receiving this information via PharmOutcomes for their patients where consent is obtained. It is therefore essential that all community pharmacies and their staff understand what this project is about and how they can use this information so please attend one of these training events.

We strongly encourage one representative from each community pharmacy that has patients that attend Lister Hospital to attend one of these events.

Please email info@hertslpc.org.uk to book your place and specify your preferred event.

EMOP aims to improve the health of the population through medicines optimisation and means that medicines information will be shared electronically from hospital to community pharmacy when patients are discharged from inpatient care at the Lister Hospital, Stevenage.

Expert speakers from Lister Hospital, Hertfordshire and West Essex Sustainability and Transformation Partnership (STP), Eastern Academic Health Science Network (AHSN) and Hertfordshire LPC will be present.
