Newly released distance learning programme – What’s new in BNF 77?

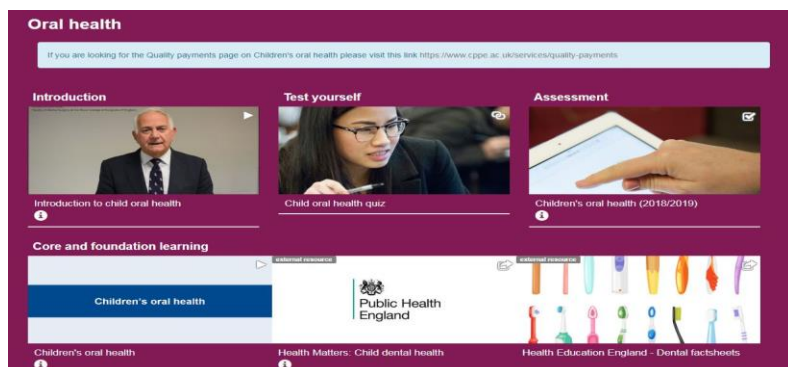

We are delighted to announce that our *What's new in BNF 77?* distance learning programme is now live.

The interactive programme accompanies the 77th edition of the BNF, which was released in March 2019.

The programme contains ten case studies that help you keep up to date with recent changes in the BNF.

CPPE gateway pages – check out the page on Oral Health

Have you seen the links to our useful gateway pages at the top of the CPPE homepage? These include a host of clinical and public health topics as well as NHS priorities such as patient safety. Use these sections and pages to access, in one place, a whole host of information including both CPPE and other external resources. Topics include Sexual Health, Mental Health, Substance Misuse and Revalidation. Why not take a look at our Oral Health gateway page to find resources to support you with the community pharmacy oral health campaign - #NationalSmileMonth.

CPPE Update – Summer 2019

Workshops and useful learning resources

Have you seen our new Avatar patients? – consulting with Stephanie, the interactive avatar patient gives you the opportunity to take your person-centred consultation skills on a test drive in a safe environment and check your approach to safeguarding and supply of emergency contraception in a safe environment.

New autumn / winter semester events 2019/2020

Look out for news about events planned for the autumn / winter semester. These events will go live on the website for booking in early July.

Keeping up to date and e-challenge

Is your “Profile” on the CPPE website up to date? Make sure your contact details are correct as you might miss out on important information. CPPE sends regular information about new CPPE programmes, current local and national events such as campaigns, and latest developments, including e-challenge and our regular email newsletter, CPPE e-news. Make sure you have ticked the relevant email preferences in your “Profile”.

Our e-challenge provides you with a regular quiz on what's new and happening in pharmacy, medicines and the NHS. You'll find questions on a range of topics such as pharmacy services, new medicines, legal issues, ethical concerns and recently released reports and research. We have teamed up with *The Pharmaceutical Journal* to help us with this so it's a great way to keep up to date and find ideas for CPD recording. We have added the odd fun question too!

Why not take a look at the current quiz <https://www.cppe.ac.uk/e-challenge/#ec>
