

Supporting HCA's, GP Nurses & Pharmacists Deliver the Diabetes Care Processes

The NICE recommends that people living with diabetes have the following 9 annual checks:

- | | |
|--------------------------------------|-------------------------|
| 1 Body mass index (BMI) | 2 Urinary albumin test |
| 3 Blood pressure | 4 Serum creatinine test |
| 5 Smoking status | 6 Cholesterol levels |
| 7 HbA1c measurement | 8 Foot check |
| 9 Eye check (retinopathy screening)* | |

With the right training and clinical supervision, unregistered healthcare staff can be supported to efficiently deliver 8 of these diabetes care processes.

**Retinal screening needs to be done by appropriately trained staff with suitable retinal photography equipment.*

HOW TO REGISTER:

- 1 Go to CDEP's website at www.cdep.org.uk or scan your phone here: 
- 2 Click on the link in the top right corner: SIGN IN/REGISTER
